SOLID SURFACES

Corian® Fabrication & Installation Technical Requirements Course

*Designed to provide the proper fabrication/installation techniques
for DuPont™ Corian® solid surfaces*

Who should attend?

***IMPORTANT:** Have you attended this training in the last 2 years? DuPont™ has made several changes to the fabrication/installation requirements. If you haven't attended in awhile, you should attend to receive and understand these updates.

- ▶ Individuals who are focused on quality and continuous improvement and want to ensure technically correct fabrication and installations
- ▶ Corian® installers
- ▶ Any shop employee who needs technical updating
- ▶ New fabrication/installation shop employees
- ▶ Others in your company who would have value for obtaining knowledge on the required fabrication and installation procedures for Corian®

This course will provide you with the following:

- ▶ Knowledge and information to improve the finished quality of every Corian® project, ensuring 100% customer satisfaction
- ▶ Corian® fabrication/installation technical information
- ▶ The Corian® fabrication manual on CD, technical bulletin updates and tool information
- ▶ Continental breakfast and lunch will be provided

Course Information

- ▶ Each course is held on a Thursday, **starting promptly at 8:00 am - 4:30 pm** (for more details, see reverse side)
- ▶ The course will include new product review, Fabrication Manual review, seaming, edge treatments, cutouts, backsplashes, integral bowl mounting, countertop installation, finishing, Technical bulletin 117 and residential/commercial warranties.
- ▶ This is a non-refundable course. In the event that the registered person cannot attend, substitutions are welcome. Hallmark must be notified of any substitutions. See reverse side for registration.
 - Non Purchasing Installers: \$349 first person; \$129 for each additional person from the same company
 - New Fabricators: \$249 first person; \$129 for each additional person from the same company
 - Existing Fabricators: \$129 per person
- ▶ This course will be interactive! Bring thoughts, ideas, questions or situations you would like to express or have clarified. Various media will be used to further demonstrate and expand on ideas and techniques being discussed. This is not a "hands-on" fabrication training course.
