

DUPONT™ CORIAN® SINK AND LAVATORY POSITIONING FOR ADA COMPLIANCE

INTRODUCTION

This guide is provided to help facilitate use and placement of DuPont™ Corian® lavatories per ADA guidelines. This guide is not intended to replace the Design Professional's review and understanding of the Americans with Disabilities Act (ADA) regulations as it relates to the installation of sinks and lavatories. These guidelines are provided as general reference for the installation of DuPont™ Corian® lavatories. It is the responsibility of the Design Professional to assure each installation complies with ADA requirements. These guidelines are based on ADA regulations in effect as of 2010. See ADA Standards for Accessible Design at <http://www.usdoj.gov/crt/ada/stdspdf.htm>.

A. DUPONT™ CORIAN® LAVATORY OVERVIEW

The table below provides an overview of the DuPont™ Corian® lavatories and sinks most often specified for use in an installation where ADA Compliance is desired.

The following points were drawn from the ADA to develop these placement guidelines.

- 34" (864 mm) maximum counter height,
- 27" (686 mm) minimum under counter (knee) clearance height,
- 8" (204 mm) minimum under counter (knee) clearance depth,
- 9" (229 mm) minimum (toe) clearance height and
- 17"-25" (432-635 mm) toe clearance depth under the counter. Any space extending greater than 6" (152 mm) beyond the knee clearance at 9" (229 mm) above the floor is not included in toe clearance calculations.

Unless noted, 4 1/2" (114 mm) clearance was allowed between the back of the bowl and the front of a 1/2" (12 mm) thick backsplash.

A: Counter depth
B: Front of counter to inside of bowl
C: Faucet deck depth
